Selenium Testing

Name: M.Sathyanarayanan
Reg No.: 24BCE1689

Aim

To write 5 test cases for my project and execute any two of them using Selenium, and record the execution.

Project

GearVault is an equipment rental web application. Customers can browse equipment like cameras, lights and audio gear, and book them for a date range. Staff and managers have their own pages for handling rentals and reports. The app is deployed on AWS.

Website: https://d2wvsbj3dzkosr.cloudfront.net

Tools Used

Selenium IDE 4 (desktop version), Google Chrome, Windows 11

Test Cases

TC ID	Test Case	Steps	Expected Result	Actual Result	Status
TC01	Sign up as a new customer	1. Open the login page 2. Click Create account 3. Enter name, email and password 4. Click Create Account	Account is created and the user is logged in. Navbar shows the email and CUSTOMER role.	Same as expected	Pass
TC02	Login with correct email and password	1. Sign up and then sign out 2. Enter the same email and password 3. Click Sign In	User is taken to the Equipment Inventory page with the correct email shown.	Same as expected	Pass
TC03	Login with wrong password	1. Sign up and then sign out 2. Enter the email with a wrong password 3. Click Sign In	Error "Invalid email or password" is shown and user is not logged in.	Same as expected	Pass
TC04	Search the catalog without logging in	1. Click Inventory 2. Select category Cameras 3. Type "Sony A7" in search 4. Click Sony A7 IV	Only matching items are listed and the Sony A7 IV details page opens.	Same as expected	Pass
TC05	Access a page without permission	1. As a guest, open /bookings 2. Sign up as a customer 3. Open /analytics	Guest is sent to the login page. Customer gets "403 Access Denied" on the manager page.	Same as expected	Pass

Execution

The test cases were created in Selenium IDE and run against the deployed website. TC01, TC03 and TC04 were executed and recorded. A short pause was added after each step so the actions can be seen clearly in the video. All test cases passed.

Screenshots

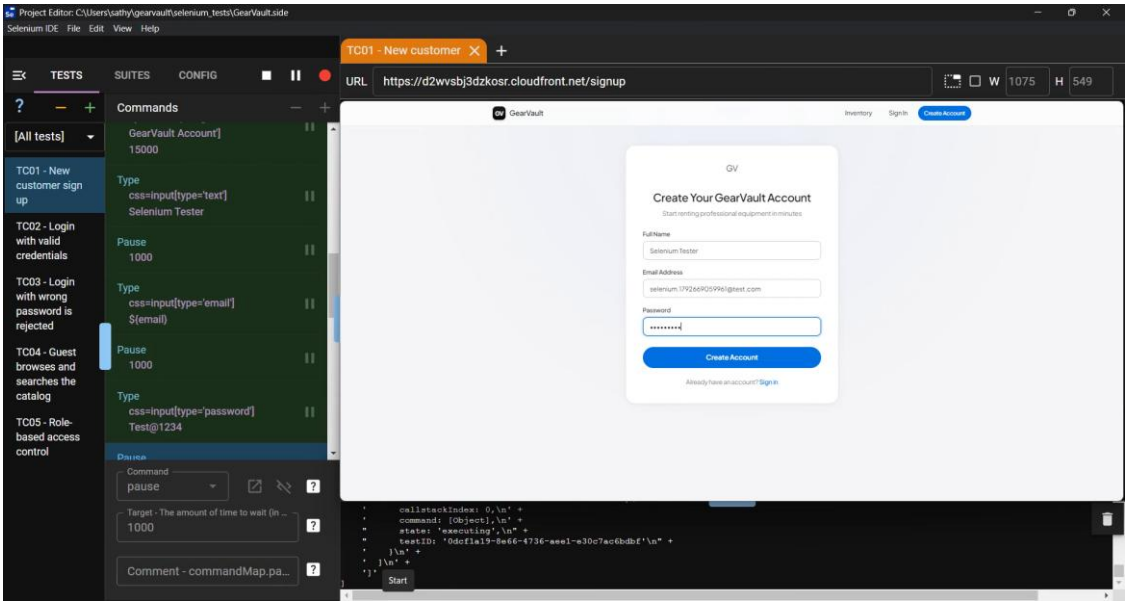

Fig 1: TC01 running in Selenium IDE (filling the sign up form)

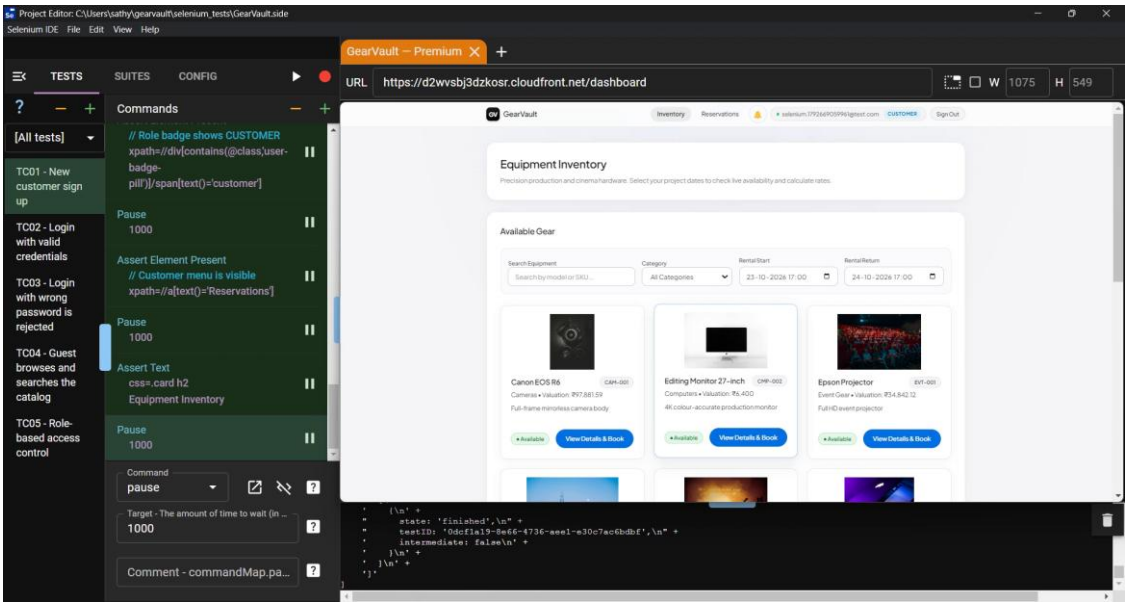

Fig 2: TC01 passed, user logged in as customer

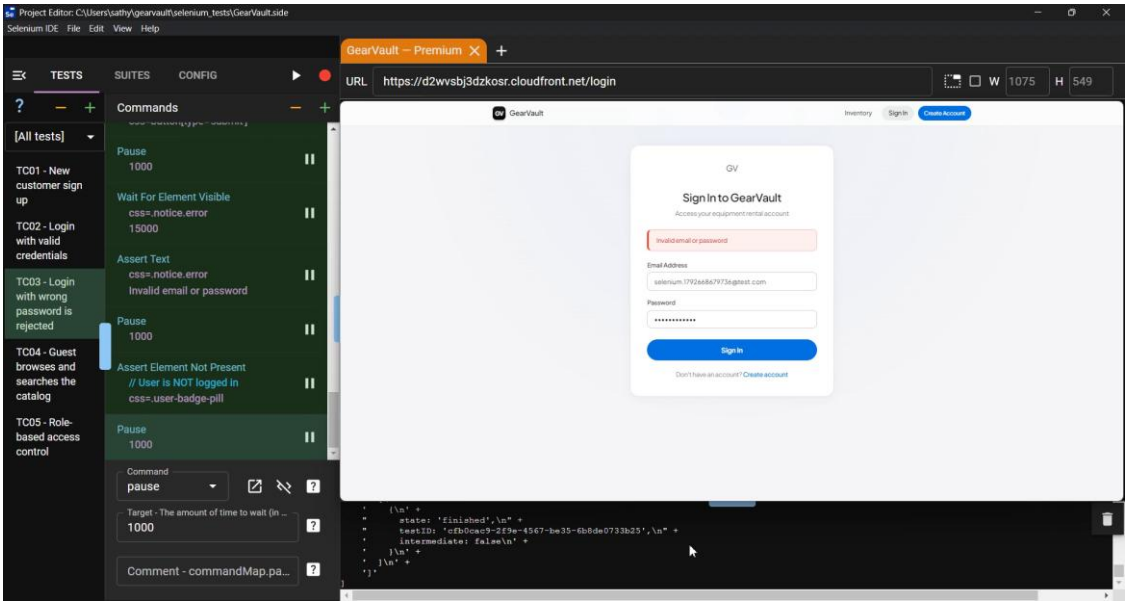

Fig 3: TC03 passed, wrong password shows an error

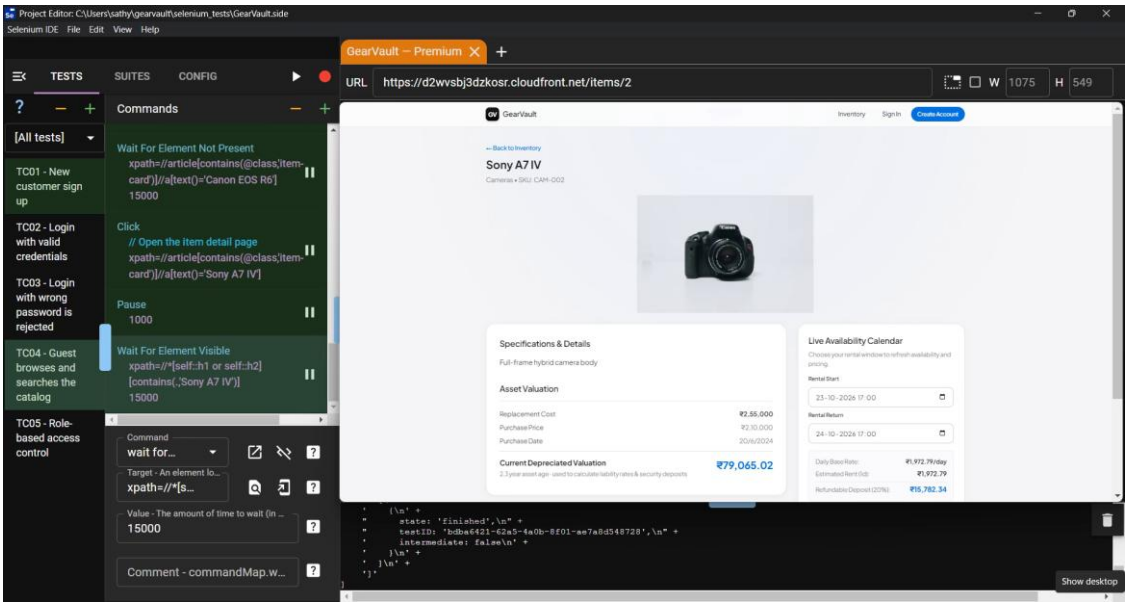

Fig 4: TC04 passed, Sony A7 IV page opened after search

Result

All 5 test cases passed. Three of them were executed and recorded using Selenium IDE.
